Introduction of Flexo Tech JSC. — Partnership Proposal for Ethyl Acetate Supply

Dear Sir / Madam,

We are pleased to introduce Flexo Tech JSC., an independent chemical raw materials trading company headquartered in Kutaisi, Georgia. We specialize in the sourcing and distribution of industrial chemical commodities to manufacturers across the CIS, Eastern Europe, and emerging markets in the Middle East and Asia.

Having established a strong network of industrial consumers — including manufacturers of polyurethane systems, flexible packaging, adhesives, and printing inks — we are actively seeking to expand our solvent portfolio with a reliable, quality-certified source of Ethyl Acetate (EAc). We believe that a partnership with your esteemed organization could be mutually beneficial, and we welcome the opportunity to explore this further.

About Flexo Tech JSC

Parameter	Details
Country of registration	Georgia (Kutaisi city)
Company type	Independent trading & distribution company
Founded	2018
Core activity	Import, storage and resale of chemical raw materials
Target markets	Bulgaria, Serbia, Turkey, Georgia, Armenia, Azerbaijan,
Annual turnover	Approx. EUR 25 million
Warehousing	Third-party licensed chemical warehouses in Georgia and partner markets

Georgia's strategic geographic position — at the crossroads of Europe and Asia — and its free trade agreements (FTAs) with the EU, and China enable us to operate as an efficient regional distribution hub. Our logistical capabilities allow us to deliver products in both bulk (flexitanks, ISO tanks) and drummed formats, depending on customer requirements.

Chemical Raw Materials Trading

Our Product Portfolio

We currently trade the following product categories:

Product Category	Key Products	End-Use Industries
Isocyanates	MDI-50, MDI-100, MDI-200 (Lupranate, Wannate, Ongronat grades)	Polyurethane adhesives, foam, coatings
Polyols (polyether)	Simple polyether polyols (various OH values)	PU systems, flexible foam, CASE
Polyols (polyester)	Complex (aliphatic & aromatic) polyester polyols	PU adhesives, laminates, coatings
Solvents	Ethyl acetate, MEK, toluene, isopropanol, MEG	Adhesives, inks, coatings, cleaning
Pigments & additives	Organic & inorganic pigments, catalysts	Printing inks, coatings, PU colorants

Why We Are Seeking a Reliable EAc Supplier

Ethyl Acetate is a key solvent consumed by several of our existing customers — primarily manufacturers of solvent-based polyurethane adhesives, flexible packaging laminates, and printing inks. Our current annual consumption requirement stands at approximately 200 metric tons, with anticipated growth of 10% per annum driven by expanding customer base.

Key consumption drivers within our customer network:

- Solvent-based laminating adhesives for flexible packaging (primary application)
- Solvent-based printing inks for flexible film printing
- Cleaning and process solvents in polyurethane manufacturing
- Pharmaceutical and laboratory-grade applications (secondary segment)

India is one of the world's leading producers of Ethyl Acetate, with major manufacturers such as Laxmi Organic Industries, Jubilant Ingrevia, IOL Chemicals & Pharmaceuticals, and Godavari Biorefineries operating at significant scale. Indian-origin EAc offers an attractive combination of competitive pricing, consistent quality, and reliable supply chain — making it well-suited to our market requirements.

Chemical Raw Materials Trading

What We Offer as a Customer

- Committed regular purchase volumes with predictable order frequency
- Long-term partnership framework with price and volume agreements
- Professional handling and storage in certified chemical facilities
- Local market knowledge and established customer relationships
- Flexible logistics: sea freight (drummed / flexitank / ISO tank) via Istanbul/Poti / Batumi ports (Georgia), with onward distribution by road or rail
- Prompt payment terms as mutually agreed
- Full regulatory and customs compliance in destination markets

Information Requested from Your Side

In order to proceed with our evaluation and prepare a formal commercial offer, we would appreciate receiving:

#	Information Requested
1	Technical data sheet (TDS) and Certificate of Analysis (COA) for Ethyl Acetate — technical grade and, if available, pharma grade
2	Available packing formats: drums (200 L), flexitanks (16–24 MT), ISO tanks
3	Minimum order quantity (MOQ) per shipment
4	Indicative FOB / CIF price range (USD/MT) for current market conditions
5	Lead time from order confirmation to port of loading
6	Export markets and any existing distribution restrictions in the CIS / Eastern Europe region
7	Company profile and quality certifications (ISO, REACH, etc.)

Next Steps

Please feel free to share any questions or requests for additional information about our company. We are prepared to provide trade references, bank details, and any documentation required for your vendor qualification process.

We look forward to building a strong and long-term business relationship with your organization.

Yours sincerely,

Manana Kiknadze
